Chopping Block Corn Box

Hot Machine Milk To Increase Volume

Corn vending machines will soon be installed in subway stations, office buildings, factories and apartment buildings and rooms, according to plans announced recently.

Vending machines will mix milk dispensed from the automats of the New York city department of health and will be operated in connection with the whole system of sanitary inspection.

Paper cup machine which opens and closes with the milk including the cup, can be set to serve from one to ten cups of milk flowing into the cup which is sucked up through the spout.

Ear-Marking the Hogs

RIGHT LEFT

Identification of all purebred hogs should be made before they are eight weeks of age by notches and ear marking. Another method, tattooing is the ear notching system. This system will take care of 99 different number combinations.

DDT Is Not a Panacea For All Known Pests

The most promising insecticide discovered since the introduction of many disadvantages, says George Gaumer and Carl J. Weidman of the University of Illinois. It is not effective against cotton boll weevil, bean beetle, cattle grub, Mexican bean beetle, cattle grub, fleas, roaches and red spiders.

It does make a long-lasting effect against mosquitoes in woods, screens and floors.

Corn Tester

Try New Coccidiosis Chicken Treatments

"Grandpa, Simpson, I didn't think conservation farming would make that much difference."

"Gray" Flour Keeps Poorly

The new "gray" flour keeps poorly in flour, batter, dough or bread, and even dough in refrigerator rolls will not keep satisfactorily much more than two days, the fresh-milled flour is best for waffles and muffins, or in other recipes calling for the use of eggs. It is suggested that rich cakes be made instead of layer cakes, and that cookies, crackers, macaroons or cupcakes are satisfactory. The new flour has two enemies, rancidity and mold, and should be kept in a cool, dry place in small quantities until immediate use.

Fewer Railroad Workers

Employment Class I railroads of the United States during the month of May, 1946 totaled 1,007,331, a decrease of 1.6 per cent under April, and 2.99 per cent under May, 1945, according to the Bureau of Transport Economics and Statistics of the Interstate Commerce

A decline under May, 1945 is shown in the number of employees for every reporting group with the exception of executives, officials and staff assistants, 0.67, and laborers (other than train, engine and yard), 0.47 per cent increase of 0.37 and 1.47 per cent, respectively. The percentages of decrease are:

Professional, clerical and general, 3.94; maintenance of way and structures, 14.60; maintenance of equipment and stores, 9.62; transportation (yardmasters, switchtenders and hostlers), 2.67, and transportation (train and engine service) 11.60.

More Trees Planted in Wisconsin

Wisconsin planted 2,042 times as many forest trees last year as any other state in the Union, the U. S. Forest Service reports.

The Wisconsin Conservation department says nurseries produced 19,000,000 trees last year, more than in all counties. The second highest forest tree producer was New York with 3,920,000. Other high producing states were Michigan, 3,768,000; Georgia, 3,467,000, and Pennsylvania, 3,333,000.

About half of the forest trees put out by the department last year were planted on farms, 6,226,900, Georgia, second in its farm plantings, nearly 3,000,000.

Local Happenings

Miss Evelyn Kestner has returned from a visit in Newport News.

Dr. and Mrs. W. E. Snead, of Charleston, W. Va. left Saturday after spending two weeks in the home of Mr. and Mrs. T. J. Gardner.

R. M. Gardner, of Roanoke, is ill at the home of his brother, T. J. Gardner.

Mrs. Lillie Gregory, of Remlik, is spending this week in the home of Mrs. J. D. Morris.

Don Moses, Jr., of Baltimore, and Billy Moses, of V. P. I. visited their mother, Mrs. Don Moses recently.

Mr. and Mrs. F. W. Gilliam, of Roanoke spent the week-end with Mr. Gilliam's mother, Mrs. Lily Gilliam, who has been quite sick.

Mrs. E. B. Hunt, of Roanoke, Massie E. Webb, of Cleveland, Ohio and Ellis Webb, of Tampa, Florida, were guests of Mr. and Mrs. L. B. Harvey last week.

Mrs. Mary Sue Gordon, of Richmond and her son, Wallace, recently discharged from the Navy, are spending this week here.

Miss Hilda Moore is spending a few days in Baltimore.

Thomas A. Johnson, of Richmond visited friends here last week-end. Mr. Johnson has received his discharge from the service, and plans to enter the University of Richmond this fall.

Mr. and Mrs. T. J. Harvey, of Richmond visited friends here, this week.

Mrs. Elizabeth Ford, of Danville spent the week-end at her home here.

A. T. Inge has recovered from a recent illness.

The McLean Circle of Liberty Baptist Church will meet in the home of Mrs. Thelma Caldwell on Thursday night, with Miss Annie Hancock in charge of the program.

Capt. and Mrs. W. H. Moore and Mr. and Mrs. J. P. Harvey, of Lynchburg spent Sunday in the home of Mr. and Mrs. L. B. Harvey.

Word was received here last week of the accidental death of Sgt. J. Holcomb Woodson, chief of the Alexandria Division of the Southern Railway Detective Force. Mr. Woodson was a native of this county and lived here for quite a number of years. He was the son of the late James and Bettie Hart Woodson, both of this county. He was well known and widely related through the county.

Dr. and Mrs. L. L. Goyne spent Sunday in Fredericksburg.

Miss Marguerite Winn, of Richmond, Mrs. J. Vance Perkins and two children, of Greenville, N. C. are visiting the Rev. and Mrs. H. Frederick Imes.

Miss Fannie Mae Cralle, of Richmond was home for the week-end.

Mrs. H. F. Jones is spending this week in Washington with her son, Mrs. Morgan Green.

The W. M. S. will hold its regular monthly meeting at Liberty Baptist Church Wednesday, August 21. Business meeting at 3:00 o'clock and program at 3:30.

Mr. and Mrs. John Kent Hamilton are the proud parents of a baby boy, born August 11th at the Virginia Baptist Hospital.

Mr. and Mrs. W. H. Smith and son, Freddie spent week with her parents, Mr. and Mrs. Eddie Warriner.

Miss Lindy Warriner was in Lynchburg Tuesday.

Mrs. Leswood Harvey and Miss Climmey Maxwell will leave Friday to visit Sgt. James Maxwell and Pvt. Raymond Maxwell at Langley Field, Va.

Mrs. Andrew Elgger and grandsons, Henry Watkins Conner, Junior, and Wallace DuPlantes, and Mrs. Earle Lauvre, of Port Arthur, Texas, who are spending some time with relatives in Halifax County, spent Sunday with Mrs. James Alexander Conner at LeeusGrove.

Mrs. William H. Corjenhaver, who spent last week in Varina, Va., has returned to her home near here.

Miss May Conner, of Danville, Miss Evelyn Conner and Mr. P. E. Conner, of Lennig, spent Sunday in the home of Mrs. Pitzer Gills.

Save Bees From an Insecticide Death

While the dusting and spraying of farm crops must be regulated upon approved practices for each individual crop, in general the use of DDT and other insecticides should be employed before blossoms appear. In general, by following this practice, it is possible to reduce the loss among bees to such a point that it is of no economic importance. Do not spray or use insecticides except upon a given method of procedure

GIARETTI - WALTON

A wedding of unusual beauty was solemnized Sunday afternoon July 28, at 4:30 o'clock in the rectory of Holy Cross Catholic Church in Lynchburg, when Miss Eugenia Walton, daughter of Mr. and Mrs. William James Walton, of Appomattox became the bride of Remo Giaretti, son of Mr. and Mrs. Emilio Giaretti, of New York City. Rev. Francis Bambrick officiated.

Palms and ferns used as a background for arrangements of white flowers gave bridal appearance to the rectory.

The bride wore a white brocaded satin gown, fashioned with close-fitting bodice, long pointed sleeves and a sweetheart neckline. The full skirt ended in a train and the finger tip veil of illusion was held with a coronet of orange blossoms. She carried zephanotis centered with a white orchid.

Miss Louise Walton as her sister's maid of honor wore pale blue taffeta and net and carried pink roses and delphinium. Randolph Gambo, of New York, cousin of the groom, was best man.

Mrs. Walton, mother of the bride was in black, and Mrs. Giaretti, mother of the groom, was in black and gray. Both wore black accessories and red roses.

A reception afterwards given by the bride's parents, was held in the Blue Room of the Virginian Hotel.

Weather Forecasters Now Using Radar Equipment

Radar and radio direction finding are being put to new civilian uses for weather studies. The detection of certain kinds of storms by radar was begun early in World War II when radar technicians noticed "ghost echoes," later recognized as thunderstorms.

The location, extent, intensity, speed and direction of thunderstorms can now be detected by radar within a 100-mile radius, reports David Brunt, professor of Meteorology at the Imperial College of Science and Technology, London. A violent hurricane on September 1, 1945, came so close to a radar station that new information about the nature of the hurricane was obtained, including the general shape and the variations in rain intensity within the storm.

Radar and radio direction finding have increased the range of pilot-balloon weather observation, making it possible to follow balloons or radiosondes—robot weather observers—through all types of weather. Formerly such observations were restricted to clear skies or to the atmospheric layer beneath the clouds.

Our Northern Neighbor

Canada has an area larger than the United States and only one-twelfth as many people; the third largest navy in the world and the fourth ranking military establishment among the United Nations. It leads the world in per capita industrial production, has the highest output of nickel, radium and earth-shaking uranium and is the biggest exporter of wheat. Its standard of living is second only to that of the U. S. It is second in the production of cargo ships, wood pulp and hydro-electric power, third in aluminum, copper and zinc, fourth in the production of gold. Though the nation's population is less than New York State's, it had more than 600,000 men under arms in World War I and lost nearly a tenth of them—more than were lost by the whole U. S.

BRIDE-ELECT ENTERTAIN FOR

Mrs. H. C. Babcock and Mrs. E. H. Frazier were hostesses at a luncheon Saturday at the home of Mrs. Babcock on Liggates Road, Lynchburg, Va., in honor of their sister, Miss Nancy Jane Dickerson whose marriage to George Mason Tureman, Jr. takes place August 17 at Salem Methodist Church, Spout Spring, Va.

The house was decorated with garden flowers and the wedding note was carried out. The honoree was presented a trousseau gift.

Those present besides the two hostesses and Miss Dickerson were Mrs. W. E. Dickerson, mother of the bride-elect, Mrs. Julian Hesson, Mrs. H. B. Martin and Misses Ann Cawthorne, Helen Martin and Erna Dickerson.

Myopia Prevalent in U. S.

Recent studies indicate that approximately 4 per cent of the children in the nation's lower elementary grades have myopia (near-sightedness), reports the Better Vision institute. The shortcoming becomes more prevalent in the upper elementary school grades and in high school. It is estimated by some authorities that more than one-third of all students in U. S. colleges are myopic. Extensive reading and other close-focusing visual tasks, it is believed, tend to hasten the development of near-sightedness among the nation's school children.

Chemical Prevents Fading

It is gas fumes normally in the air that sometimes mysteriously fade the city girl's bright summer dress, but small quantities of a new chemical will help put an end to that.

The chemical is added at the mill when the fabric is being dyed. It makes possible faster colors on acetate rayon fabrics widely used for women's apparel. Small amounts of the chemical give better fastness to certain colors which tend to fade when exposed to the normal atmospheric gas fumes.
